

Pharmacy Fraud Solutions

Prevention, Detection, Resolution

Prescription drug fraud is a costly problem for health insurance providers but identifying perpetrators can be difficult. It can be a challenge for insurance providers, Pharmacy Benefit Managers, Managed Care Organizations, and regional pharmacies to understand and stay ahead of ever-evolving fraud risks and proactively identify and investigate active threats. Pharmacy Investigators and Consultants' COPs system is a comprehensive pharmacy fraud solution focused on prevention, detection, and restitution. CARs, the companion product, facilitates easy and quick document retrieval for auditing and recovery purposes.

Who Benefits?

- Health Plans and Managed Care Organizations
- Pharmacy Benefit Managers
- Hospital and Clinic Pharmacies
- Chain and Independent Pharmacies
- Health Care Litigators

Services

- Predictive analytics to score and rank- order highest-risk cases for investigation
- Complex network analysis to uncover fraudulent provider rings
- Desk audits to discover data entry errors
- Private Investigation services to investigate fraud rings and work with legal resources for restitution and prosecution

Benefits

- Reduce False Positives
- Maximize Fraud Recoveries
- Prioritize Cases for Investigation
- Improve Investigative Resource Efficiency

What is CARs?

CARs, or Claim Audit Recovery System is a companion software-as-a-service product to COPs. CARs automatically downloads claims for audit and re-ingest claims for enhanced supervised (artificial intelligence) learning.

The CARs system is unique in the pharmacy fraud auditing industry because:

- CARs provides a quick and secure method of obtaining claims audit documentation from pharmacies.
- Claims data and the visual documentation provided by the pharmacies is matched and easily reviewed by auditors, reducing audit error.
- CARs automatically updates audit dashboards and provides up to the minute status of audit workload.
